Gary Morgan, CDT

Gary Morgan is the Senior Consultant and Vice-President for SafeLink Consulting, Inc. Gary began lecturing on health and safety in 1989 and is an authorized trainer under OSHA’s Outreach Program. Gary is also a certified DAMAS consultant and auditor.

Course Topic:
In this presentation, Gary will provide updated information on federal OSHA and state specific compliance issues including infection control, emergency planning and new hazard communication rules. Gary will inform the denturist, as healthcare providers, why compliance is an effort worth making for the safety and well-being of the denturist’s patient, the denturist’s staff and the denturist’s professional office in general.

Dean Fenwick is a sought after speaker and educator on practice management for denturists throughout the U.S. and Canada. He has taught 4 year required courses for use of computers in the denturist's practices for Northern Alberta Institute of Technology, and computer science, business management and entrepreneurship at the high school and college levels. Dean now focuses exclusively on providing specialized practice management solutions for denturists.

Course Topic:
Specific techniques will be presented to increase office efficiency from the waiting room, the front desk to the laboratory and fabrication of the appliance.

Joseph Della Marina, DD, LD

Joseph Della Marina is a graduate of George Brown College and has been active in the profession since, not only in his private practice where the major focus is implant prosthetics but as an instructor for the IDEC denturist program both in the U.S. as well as England. He has also served as an instructor for the denturist program at George Brown College.

Course Topic:
This class will present a variety of implant how to’s and how not to’s and blunders and discuss how to successfully meet the various challenges involved in serving patients with oral prosthetic implants. The course will emphasize the sequence of appointments between the denturist, the dentist and the patient regarding case presentation, the biological aspects of implant placement as well as the fabrication of the appliance.

Chris Bormes has earned both the International Congress of Oral Implantology Fellowship and Mastership in Dental Implant Technology. Chris joined PREAT Corporation, a family owned precision attachment company, in 1997; he was named president in 2010. PREAT has no affiliation with a specific implant company thus maintains constant ongoing product and technique development from various sources. This comprehensive knowledge of available products proves invaluable.

Course Topic:
This overview of major implant attachments and the advantages and disadvantages of each and how to select the best attachment for individual patients will prove invaluable to the denturist serving patients with implant dentures. Solutions for servicing worn attachments will be discussed.
